DETAILED ACTION

Upon talking with the applicant concerning the clear error pertaining to the specification, the Examiner has concluded that the specification is fatally defective. The specification is clearly not the right one for the current application. In order to speed up prosecution of the application, the Examiner has withdrawn the restriction requirement.

Claim Rejections - 35 USC § 112

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 1-78 are rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention.

The specification of the application is clearly not disclosing the claimed invention.
